

MASZYNY-SERWIS

MACHINE RENOVATION

MASZYNY-SERWIS

OFFER

Based on our more than twenty years of experience in the construction of eccentric presses and their components, we carry out comprehensive repairs of eccentric presses and their components. As part of the revitalization of used eccentric presses, we perform, among others, the following works.:

- regeneration of shafts and other drive components
- regeneration/replacement of plain bearings
- replacement of electrical, hydraulic and pneumatic installations

regeneration and legalisation of the dimensions of elements important for the exploitation
